COMPANY PROFILE

Guangzhou J&J Sanitary Ware Co., Ltd. (JNJ SPAS) was established in 2000, who a professional sanitary ware manufacturer specializing in Hot tubs, Swim spas, Well-being auxiliary appliance and Aqua therapeutic exercises sports equipment, the products divided into three series totaling 168 models.

Our company awarded High and New Technology Enterprise and The Enterprise Research and Development Organization of Guangzhou, and more than 60 patents. We also passed ISO9001/2015 management system and ISO 14001-2004 environmental protection certification, and the first company to established by the U.S. ETL electrical safety laboratory and an auxiliary witness laboratory approved by the TUV electrical safety laboratory in Germany in our industry. The laboratory was also been recognized by China National Accreditation Service for Conformity Assessment (CNAS) , it is the only company to obtain this honor in this industry. Guangzhou J&J Sanitary Ware Co., Ltd. also receives the TUV MARK certification issued by the TUV laboratory, This certification requires manufacturers and products to comply with safety, mechanical, chemical and microbiological tests

FITNESS, LOSE WEIGHT PREVENT-INJURY RUNNING IN WATER

Running is a very good sport, during running, our legs and feet, waist, heart-lung all can get well exercise. But running also have disadvantage, even the professional running will bring injury to every joint of legs and feet. If we choose underwater running, like swimming, the injury will reduce to minimum, but have very small training effect for the of muscle of legs.

Why don't choose two become one? JNJ fitness treadmill pools offer you with this kind of perfect experience.

Bouyancy of water relieve the weight of body, reduce more oppress on joints, thereby, effectively reduce the injury on joints of legs, suffering from running. More and more professional athletes are choosing the cross-training way of underwater running.

Water resistance is more bigger than air resistance, heat consumption will increase greatly, Perfect for slimming down people.

JNJ fitness underwater treadmill is having a adjustable speed conveyor belt on bottom, can be adjusted the speed 1-8 kilometers per hour, It is the best exercise equipment for fitness and underwater rehabilitation.

JNJ SPAS

INTEGRATED PORTABLE DESIGN

JNJ Fitness Treadmill Pools, adopt integrated portable design and intelligent control system, the user can choose the suitable temperature from 20 to 30 degrees centigrade assure to be used in 365 days of a whole year, fully meet your non-stop requirements of fitness, rehabilitation spa.

INGENIOUS DESIGN

ONE-TO-ONE SAFETY PLATFORM

Not only prevent the dangerous of fall down or jump into water, ensure people's safe, user stay on the safety platform cozily, but also it is the safety platform for your coach or the rehabilitation nurse.

TOUCH SMART CONTROL PANEL

The treadmill has its own independent operating system and touch intelligent control panel. 4 kinds of motion modes are available, intelligent technology, simple and convenient to operate.

SAFETY KEY

Safety Key is a protective device during your movement exercise, connect with the Safety Bracelet, just pull the Safety Bracelet, the Safety Key will be off, to switch off the power immediately.

INGENIOUS DESIGN

HUMAN HEART RATE SENSOR

It's important to keep the heart rate a suitable level during sporting. JnJ fitness treadmill pools has a heart rate monitoring system, it will help you learn about your body status during the motion, thus help you reach the most out of your workout.

SAFETY BRACELET

Afraid of fall down on the treadmill? This will never happen! JNJ Fitness Treadmill Pools is with a Safety Bracelet, just pull it slightly in a emergency, the working machine will stop running immediately, without any injuries.

ANTI-SKID SHOES

Anti-skid Shoes is professional shoes for diving, With a tough and durable rubber bottom, very comfort, It can effectively avoid possible injuries to human knee and ankle joints. The sole is designed with special horizontal grooves and a good grip to prevent slipping when entering or exiting water. Elastic Laces for quick wear and take off.

INGENIOUS DESIGN

RESISTANCE FORCE NOZZLES

Equipped with resistance force nozzles which can be adjustable, act as incline setting of dry treadmill. Knee joints will be impaired in various levels due to run on rough roads, especially uphill and downhill. Joint injury will be minimized as water resistance when we run on JNJ FITNESS TREADMILL POOLS. Meanwhile, JNJ FITNESS TREADMILL POOLS provide different running intensity via resistance force nozzles, equal to 1~8% incline setting of dry treadmill.

WATER TREATMENT

JNJ FITNESS TREADMILL POOLS equipped with high-efficiency water treatment system which comply with European law.

FOLDING SEAT

Running is different with other exercises, it need fully breaks, JNJ fitness running pool has rest seat, it can make you more comfortable, more healthy.

4 SPORTS MODES

- JNJ Fitness treadmill pools have four sports modes: Jogging, Acceleration, Sprint, Free, to cater different users' demands.
- They are not just a treadmill or pool, but a brand new sports equipment integrating with high technology, humanization design, fitness and rehabilitation functions.
- While exercising, relaxing, JNJ fitness treadmill pools can also provide certain rehabilitation assistance for the injured, shorten recovery time, and create a healthy life for users.

FREE MODE

It is mixed mode as well, let users choose speed, level and mode by themselves freely.

Suggest users to choose mixed mode, warm up for 3 minutes at speed of 3-4km/h, then do as per below:

Curve of variable speed, Walk for 30 seconds at speed of 6km/h, then walk for 30 seconds at speed of 8km/h; Walk for 45 seconds at speed of 6km/h, then walk for 45 seconds at speed of 8km/h; Walk for one minute at speed of 6km/h, then walk for one minute at speed of 8km/h;

Adjust resistance jet to the maximum at whole process, end with ease exercise.

AEROBIC EXERCISE

Aerobic exercise can fully burning sugars, as well as consuming body fat, Strengthening cardiac and pneumonic function, prevents osteoporosis, and adjusting psychological and mental state. It is the main form of fitness exercise.

Professional advice: Firstly, jogging 2 minutes in 2km/h, then, jogging by tiptoe 1 minute in 4km/h, after that, jogging by heel 1 minute in same speed.

After steps above twice, turn on Resistance force nozzle, Switch to the medium speed, striding 2 minutes. Turn off Resistance force nozzle, jogging 2 minutes.

QUICK WEIGHT LOSS

Excess weight increases the risk of cardiovascular disease. So, losing weight quickly in the right way to keep healthy and fit is necessary. As water resistance, water running will burn more sugars and consume more body fat, better way for fat people. Professional advice: Jogging for 5 minutes in 3~4km/h to warm up, then fast running 5 minutes with high speed of Resistance force nozzle. After that, turn off Resistance force nozzle and jogging 2 minutes in 2km/h. 4 times repeat steps above. Soothing activity at last.

SPRINT

Help users achieve much better effect from exercise, build more strong and beautiful body shape. Suggest users to warm up for 5minutes at speed of 4-5km/h, then sprint for 6minutes, adjust resistance jet to the maximum, close resistance jet, walk for 2minutes at speed of 2-1km/h. Repeat 4times, then do ease exercise.

MASSAGE WATER GUN

- JNJ FITNESS TREADMILL POOLS equip with strong massage water gun which can be used for local massage.
- Massage after exercise can reflectively improve and regulate the function of central nerve, eliminate fatigue.
 - The lactic acid that accumulates in the muscle during exercise can be transformed or excreted as soon as possible through massage after exercise.
 - Not only that, in the rehabilitation process, injured patients can speed up recovery through proper massage.

MONITORING SYSTEM

- During exercise, the wrong motion can cause additional damage to the body.
- In order to give users a better experience of fitness, rehabilitation, JNJ FITNESS TREADMILL POOLS can choose to install monitoring system, real time delivery the actual motion of the user underwater, in order to better correct the wrong action.
- In addition, the monitoring system of JNJ FITNESS TREADMILL POOLS also has the function of remote training monitoring. In the absence of a doctor or coach, users can conduct rehabilitation and exercise training by themselves with remote guidance from a doctor or coach.

FITNESS TREADMILL POOLS

The increasingly busy modern city, the rapid pace of life, heavy workload, all bring people various pressure.

Proper exercise can not only release the stress, but also strengthen the body and keep healthy.
The JNJ FITNESS sport POOLS, a pool with TREADMILL,
allows you to enjoy the convenience of technology while relaxing and exercising.

Luxury design style allows you to enjoy every healthy exercise time.

Model : SPA-8368

Size : 3400X2280X1360/1500mm
133.8"x89.7"x53.5/59.0"

Water Capacity : 1100gal

Colour : White

Power Supply : 220~240V/50HZ

Shell : Acrylic

A NEW RUNNING WAY

The exerciser put on the special water sport coat, and then run in waist deep water. This is a very modern and practical sport. Because when running in the water, the resistance is very big, so it makes the body get better exercise and speeds up metabolism. If the relatively thin person do this sport, it is easy to hunger, and thereby increases appetite and effectively improves digestive system function to enhance physical fitness.

FITNESS TREADMILL POOL DIAGRAMMING

CORE TECHNOLOGY

VARIABLE-FREQUENCY REGULATING SPEED TECHNOLOGY

It is more convenient, more efficient and more reliable to adjust the running speed smoothly and evenly.

SHOCKPROOF RUBBER STRIPE

Use silicone as supporting leg, user treads on it cozily, more steady.

FLUID DRIVE

Ensure that there is no electrical contact in the running part of the treadmill underwater, so it is safe and reliable.

MECHANICAL SEAL

Protect bearing, extend treadmill's life span, ensure the lube won't leaking, don't contaminate water.

MULTIPLE OPTIONS FOR COLORS

JNJ Fitness treadmill pools are not only provide healthy lifestyle and treatments, but also provide you multiple options for colors. You can choose what you like and make your own dream pool. We will provide what you need to make your life perfect.

SPORTS FITNESS

REHABILITATION PHYSIOTHERAPY OVERALL PLANNING

AND DESIGN

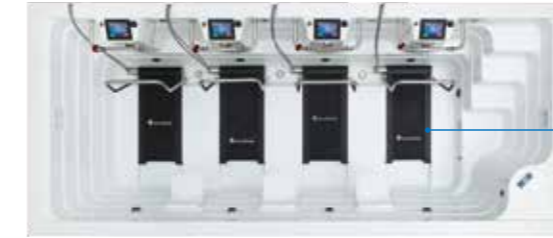

REHABILITATION SERIES

The products mainly include three series of aquatic massage equipment, barrier-free auxiliary equipment and water rehabilitation sports equipment.

JNJ SPAS water sports training equipment utilize the therapeutic properties of water to set up a relatively gravity-free environment, which can help patients achieve ideal physiotherapy effects for who need muscle training and treatment, rehabilitation and recovery.

JNJ SPAS can provide personalized solutions upon different needs of customers for customized products to make sure they perfectly match high-end clubs, spas, rehabilitation centers, health centers.

RUNNING IN THE WATER IS A NEW RUNNING WAY TO KEEP FIT, LOSS WEIGHT, ANTI-INJURY.

The integrated portable design and intelligent control system meet the uninterrupted requirements of fitness and rehabilitation.

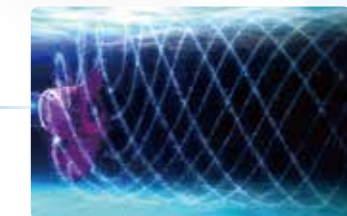

Equipped with powerful water gun which can quickly convert or excrete accumulated lactic acid in muscle producing during exercise.

The monitoring system is installed so that the patient or user can perform rehabilitation and exercise training without the presence of a doctor or a coach.

BARRIER-FREE AUXILIARY EQUIPMENT

The equipment obtained a number of national invention patents and utility model patents, let user get into hot tub of his home or fitness treadmill pool of spa center or athlete muscle recovery training sink of rehabilitation center more easily, improve the well-being of rehabilitation patients.

PROFESSIONAL TRAINING POOL

JNJ SPAS adopt propeller technology, frequency conversion technology, apply special designed counterflow device to produce laminar flow, speed of the flow can be switched, the maximum flow rate reach at 2.3m/s, it is the best choice for natator. The unique flutter effect of propeller technology resonates with the fat in human body to consume excess fat, which is good for weight loss. If JNJ SPAS underwater treadmill be installed at front of counterflow device, it will be the best spa rehabilitation equipment for recovery and rehabilitation.
